

WOX

Safe &
Effective
Operation

Simple and controlled sanitary management.
Hoshizaki Acidic Water Electrolyzer is easy-to use.

Hoshizaki Water Electrolyzer

WOX-40WA-EW

Compact sleek
design

Up to 4 litre
per minute output.

Sanitary touch-less
operation

Environmentally friendly &
economical to operate.

HOSHIZAKI

Easy operation for your daily sanitary management.

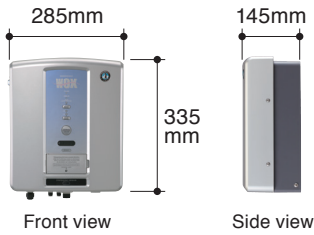

Specialised acidic electrolyzed water can be used for hygienic cleaning of food preparation surfaces, kitchen equipment & utensils.

Simple functions for easy operation & installation.

Convenient & safe sanitary management.

Compact body size

Compact & sleek design.
Minimal space required for installation.

Compact & Powerful

Max 4L/min capacity

Compact & powerful dispensing.
Max 4L/min is available with "HI" mode.

Environmentally Friendly & Economical

Minimize waste alkaline by producing strong acidic electrolyzed water.

Sanitary touch-less operation

No contact required to operate.
Built-in touch-less sensor activates & dispenses electrolyzed water when hand approaches.

Acidic electrolyzed water is generated on the cathode side by applying an electrical charge to a mixture of ordinary tap water and salt. Acidic electrolyzed water contains hypochlorous acid (HClO), strong bactericidal action and minimum residue. Recommended for hygienic cleaning of food preparation surfaces, kitchen equipment & utensils.

WOX-40WA-EW

ITEM	Hoshizaki Water Electrolyzer	
MODEL	WOX-40WA-EW	
POWER SUPPLY	1 Phase 220-240V 50/60Hz 0.6kVA(6.0A)	
AMPERAGE	2.6/2.6A	
ELECTRIC CONSUMPTION	170/170W	
STANDARD PERFORMANCE	PRODUCTION RATE	Sanitising Water : Approx. 1.5-2.0L/min, Cleaning Water:drained
	AVAILABLE CHLORINE	Sanitising Water : 20-60mg/kg
	pH	Sanitising Water : Approx.3 or less [Note] Water Temp 25°C, Electrolytic Voltage 10V, Electrolytic Current 13A(Toyoake City Water)
